

Deck-Mounted Tub Spout
6919-MA-80CP

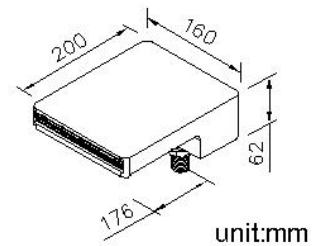

INTRODUCTION:

The internal structure of the Mark series bathtub spout has multiple compartments, which can slow down the speed of the water flow. In addition, the outlet fence in the front has a rectifying effect, which makes the outlet water similar to the natural flow. The simple shape of the product is set off against the cascading stream of water, which is like being in the natural environment when bathing.

DESCRIPTION:

1. Material of sand-casting body meets ISO CuZn40Pb standard.
2. Brass with chrome-plated; meets the standard of ASTM-SC2 for 5 years guarantee; passed 96 hours Salt Spray Test.
